

VAIBHAV SHARMA

Python Backend Developer | Django & REST APIs | AI Chatbot & NLP Systems
+91-7533813494 | sharmavaibhav97631@gmail.com | Gurugram, Haryana | Open to Relocate | [LinkedIn](#)

PROFESSIONAL SUMMARY

Performance-focused Python Backend Developer with 2+ years of experience designing and delivering scalable REST APIs, AI-powered chatbot systems, and NLP pipelines. Track record of building end-to-end backend solutions using Django, PostgreSQL, MongoDB, and Redis, with experience in RAG architectures, socket-based communication, and real-time notification systems across HR-Tech, ride-hailing, and data security domains. Seeking a backend or Python developer role to strengthen API performance, system architecture, and intelligent automation.

CORE TECHNICAL SKILLS

Languages: Python 3.x (Primary), Bash Scripting

Frameworks: Django, Django REST Framework (DRF), Django Channels, Flask, FastAPI

AI / NLP: Spacy NLP, RAG (Retrieval-Augmented Generation), Rule-Based Chatbots, NLP Pipelines

Databases: PostgreSQL, MongoDB, MySQL

Messaging & Real-Time: Redis, Celery, WebSockets, Django Signals, Django Channels

API & Tools: REST API Design, Postman, Swagger UI / OpenAPI, PgAdmin4, Pytest

Cloud & DevOps: AWS, Jenkins CI/CD Pipeline, Linux (Ubuntu), WSL

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Python Backend Developer | Skytrack Technologies Pvt. Ltd.

Jan 2026 - June 2026

Domain: Restaurant ERP & Inventory Management (RoundTheClock / RTC) | Stack: Django, PostgreSQL, Redis, Celery, REST API

- Developed complete backend for RoundTheClock (RTC), a large-scale multi-outlet restaurant ERP platform, from scratch using Django, PostgreSQL, Celery, and Redis.
- Designed and implemented REST APIs covering full CRUD operations, advanced pagination, multi-field filtering, and optimized query handling for efficient frontend integration.
- Built backend modules for batch-level inventory tracking, stock movements, dispatch workflows, manufacturing, and expiry management across multiple outlets.
- Implemented Role-Based Access Control (RBAC) and outlet-level data restrictions; integrated Razorpay payment workflows including order creation, verification, and refund processing via Celery background tasks.

Python Developer (Backend) | E-Software Solutions Pvt. Ltd.

Aug 2025 - Dec 2025

Domain: Ride-Hailing & Transport | Stack: Django, PostgreSQL, Celery, Redis, REST API

- Engineered a bulk notification system using Celery and Redis, delivering messages to 10,000+ users simultaneously with background task queuing and retry mechanisms.
- Built a Driver Dashboard and a Ride Management Dashboard with real-time operational metrics and multiple dynamic filters for operations teams.
- Optimized data loading from PostgreSQL to Django Admin, reducing load time and improving usability for large datasets.
- Created REST APIs for frontend integration and resolved critical search and filtering bugs in Django Admin, improving internal tooling accuracy.

Python Developer - AI & NLP | Computing Mind Technology Pvt. Ltd.

Jan 2024 - Jul 2025

Domain: HR-Tech & Data Security | Stack: Django, MongoDB, Spacy NLP, RAG, WebSocket, AWS

- Built an AI-powered conversational chatbot using Spacy NLP and RAG (Retrieval-Augmented Generation) architecture with hybrid rule-based + RAG pipeline logic, increasing response accuracy.
- Enabled real-time bidirectional messaging via WebSocket-based socket communication for live user interactions.
- Led the Python 3.8 to 3.12 upgrade and a MongoDB version upgrade, improving runtime performance, compatibility, and security.
- Developed a Dashboard module integrated with Django REST APIs and provided detailed Swagger UI documentation for QA and frontend teams.

EDUCATION

Master of Computer Applications (MCA) — Chandigarh University, Mohali, Punjab (2024 - Present)

Bachelor of Computer Applications (BCA) — Dr. Bhimrao Ambedkar University, Agra (2019 - 2022) | CGPA: 7.68 / 10

CERTIFICATIONS & CONTINUOUS LEARNING

Advanced Python backend & API design (Udemy, Django/DRF docs) • AWS deployment via Jenkins CI/CD pipelines • Self-driven study of NLP & AI chatbot architectures applied to production projects.
